Adventure-romance - mystery-battle, murder and sudden death! Well, rather. And action, action, action-on every page. That's Randall Parrish's new story, "The Mystery of the Silver Dagger."

Suppose you were an American diplomat and you fell in love at first sight with a wonderful, mysterious girl who was apparently deep in an international revolutionary conspiracy and you had the identity of a famous crook thrust upon you and you found one of the chief conspirators dead from a stab with the mysterious girl's silver dagger hatpin! And suppose you set to work to break up the conspiracy and solve the murder and win the girl-wouldn't you be busy? Well, that's this hero and this hero's job.

Special Care of Baby. That Baby should have a bed of its own all are agreed. Yet it is more reasonable for an infant to sleep with grown-ups than to use a man's medicine in an attempt to regulate the delicate organism of that same infant. Either practice is to be shunned. Beither would be tolerated by specialists in children's diseases. Your Physician will tell you that Baby's medicine must be

prepared with even greater care than Baby's food. A Baby's stomach when in good health is too often disarranged by improper food. Could you for a moment, then, think of giving

to your ailing child anything but a medicine especially prepared for Infants and Children? Don't be deceived. Make a mental note of this:- It is important, Mothers, that you should remember that to function well, the digestive organs of your Baby must receive special care. No Baby is so abnormal that the desired results may be had from the use of medicines primarily
